

Greetings to all South Africans, servants and supporters of the Peace Revolution.

2018 has been a very long and challenging year for most South Africans as crime was common, unemployment increased, the cost of living soared due to increases in VAT and petrol, and poverty was the order of the day. However, it is in this year filled with gloom that the child - the African Transformation Movement - was born. This is the child many South Africans have been praying and longing for.

The ATM is a **Movement of the people by the people for the people** with an objective to liberate all South Africans from all kinds of oppression be it racial, social, economic, structural, etc. Our task is to Transform our beautiful country so that all who live in it can live equally and enjoy a quality life.

As we celebrate Christmas, let us remember Christ who sacrificed His own life for others to live. We must embody the character of Christ, it is this character in us that will empower the entire population on the values we subscribe to, the values that will make us to live equally amongst each other as a people. The Spirit of Christ must be upon us so we can **serve** the entire population of South Africa. Our beautiful country is in dire need of Servant-Leaders who put the needs of the people before theirs.

South Africa needs leaders who will **PUTSA 1st**.

With such leaders, rest assured the structural design that yields poverty, unemployment and gross inequality levels for the majority of our people will be defeated. South Africa needs morally upright leaders who genuinely love their people and are driven by the mission to fully liberate our people.

History will remember the good men and women who fear God, who stood up and served the country in these trying times.

Merry Christmas to you all and let us celebrate this festive season responsibly.
